**Greether**

This test consists of developing a functional application that must integrate some of the technologies mentioned below

Ionic
React
native
Github
Figma
Angular
JavaScript
Sendgrid

Greether

The app to be developed will be used for a fictional travel signup to Greether, which should be able to perform the following actions:
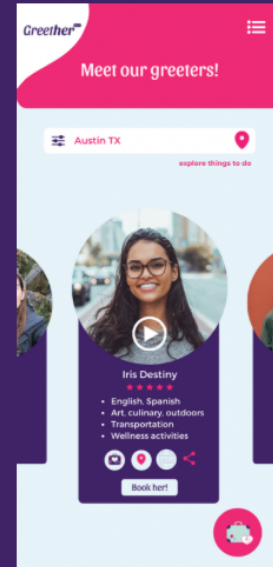

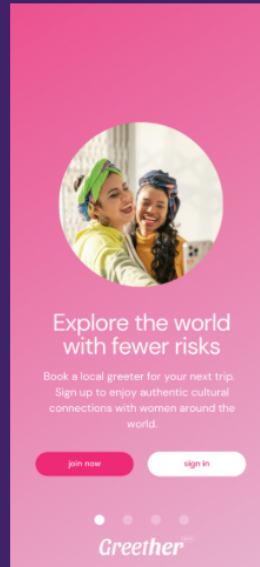

- User registration signup and login
- embed a map with locations and create a user profile that can be clickable from the location search

Greether

A little help

Here are some mockups you can use for inspiration.
Our fonts are: Sansita and Montserrat
